## I claim:

- 1. A stethoscope cleansing unit comprising:
  - a holding chamber with reversibly opening chamber lid member, said holding chamber with an inner core comprising a wicking member extending distally down through said holding chamber and proximally up through opening in said reversibly opening chamber lid member;
  - a measure of antiseptic liquid suitable for wicking by said wicking member; and a stethoscope-receiving member attached to said chamber lid member, allowing access to proximal end of said wicking member.
- 2. A business method for advertising medical products or services to medical personnel comprising the steps of:

selecting a stethoscope cleansing unit comprising:

- a holding chamber with reversibly opening chamber lid member, said holding chamber with an inner core comprising a wicking member extending distally down through said holding chamber and proximally up through opening in said reversibly opening chamber lid member; a measure of antiseptic liquid suitable for wicking by said wicking member; and
- a stethoscope-receiving member attached to said chamber lid member, allowing access to proximal end of said wicking member;

1		attaching individual marketer's logo or other advertising to said stethoscope
2		cleansing unit; and
3		positioning for viewing by patients and medical personnel said stethoscope cleansing
4		units in medical service facilities.
